

FREIGHT & DELIVERY SCHEDULE

SALT LAKE CITY, BOISE, PORTLAND & BILLINGS INBOUND FREIGHT SCHEDULE

The freight schedule listed below is for truckload freight charges from the factory to GID warehouses. The calculation for freight is made by multiplying the FOB factory list price by the percentage shown for each supplier. **These freight rates apply to "on hand" inventory only and do not apply to special orders or out of stock items.** Lines with FOB GID freight rates have the freight already added into the published list and net prices. Lines showing an LTL designation will be shipped from the factory on common carrier at less than truckload rates.
