FOLDABLE SUNFLOWER HEADER

MODEL	ROWS	SPACING (in)	WIDTH (in)				WEIGHT	
			Transport		Work		Chopper	No Chopper
			27	29	27	29	29	29
TM-RP2	6	23/35	122	127	174	185	5070	5621
	8	23/35	122	155	230	244	5952	6724
	10	23/35	147	155	281	299	7165	7826

**MAIZE Headers fixed and foldable "WONDER CORN"**  
 The fixed and foldable maize headers, operate with all combines makes and models. The row units sturdy frame is electrically welded with cataphoresis treatment. The gathering chains are mounted with automatic turnbuckles to ensure a correct tension while the low profile and hinged metal covers and points (ideal to harvest laid down product) allow for easy and quick maintenance. The stalk chopper gear boxes are in a lateral forward position, with low power absorption. Thanks to a lever, the chopper can be activated/deactivated at any moment. The milking rollers can be supplied, at choice, either with self sharpening blades with carbide tungsten insert or with winglets. The snapping plates are controlled either electrically directly from

the cabin. Safety clutches are mounted both on the main auger and on the row units. In addition, the transmission chains are automatically lubricated while the header is operating. The closing on the foldable headers is controlled directly from the cabin and when "closed" the width of the header abides to the circulation code standards.

- On request**
- Blade or rotative sunflower kit to harvest small sunflower areas.
  - Choppers
  - Snapping plates with electric control
  - Lateral conic augers with hydraulic system with oil tank and a valve to adjust the rotation speed
