3 PT & WHEEL DITCHERS

Ditches can be made with one pass , although better banks are accomplished by making two or more passes allowing tractor tires to pack the partially made banks.

- Makes new ditches up to 22" deep.
- Ideal for cleaning weedy or sodden old ditches.
- Curved wing rolls dirt up and out.
- Wing tilt adjustment with adjust-a-screw or hydraulic cylinder changes slant of banks.
- Replaceable high carbon point carves round bottom ditch.
- Replaceable cutting blades.
- Heavy duty frog and cross bracing.

3 POINT DITCHER CATEGORY II

- 3" x 8" cylinder fits into beam for more depth & more clearance (not included in price).
- Available in 6' or 7' widths.

DIGS IN & STAYS IN

- Hooks to tractor draw bar.
- Heavy 3"x 5"x 3/8" beam.
- Standard 3"x 8" cylinder controls depth (not included in price).
- Available in 6', 7' or 8' widths.
- 11' heavy duty ditcher for canals available on special order.
