(1) Low germination may occur due to shallow seeding depth for this seed.

Brillion assumes no liability pertaining to seeding rates achieved with this seeder. Rates listed are general in nature and should be used as starting points only. Seed varieties and blends listed represent those calibrated through in-house test meters. Variations in actual rates may be realized due to differences in seed lots. For accurate rates with seeds being used, follow the calibration instructions listed on the seed chart inside the box cover or refer to the Operator's Manual. *The information listed in the above seed charts is subject to change without notice.*

Till 'N Seed® 6' Model

Model BPSB-6 Shown with Optional Acre Meter Kit

Designed from customer input on interseeding and overseeding, the Brillion Till 'N Seed will seed into existing turf and pasture seedings. The front drive rotor engages the soil and drives the tillage rotor nearly two times faster, mixing the seed into the soil. A floating firming roller covers and closes the seeding process. The seed depth will vary with the density of the soil and/or number of seeding passes. The unique ground drive system and self-cleaning rotor design separate the Till 'N Seed from the rest of the competition.

(1) Low germination may occur due to shallow seeding depth for this seed.

* Indicates intermittent flow or cracked seed.

Brillion assumes no liability pertaining to seeding rates achieved with this seeder. Rates listed are general in nature and should be used as starting points only. Seed varieties and blends listed represent those calibrated through in-house test meters. Variations in actual rates may be realized due to differences in seed lots. For accurate rates with seeds being used, follow the calibration instructions listed on the seed chart inside the box cover or refer to the Operator's Manual. The information listed in the above seed charts is subject to change without notice.

Till 'N Seed®

8' Models

Model BPSB-8 Shown with Standard Equipment

Cover more acres faster with the 8' Till 'N Seed model from Brillion. Like the proven 6' model, the 8' Till 'N Seed will seed into existing turf, renovate pastures, restore athletic fields, reseed golf course fairways, interseed residential lawns and plant food plots. The unique ground drive system and self-cleaning rotor design creates enough tillage action to mix the seed into the soil, without disturbing vegetation already in place. A rear firming roller provides optimal seed to soil contact. The 8' model is available in a three-point hitch or pull-type configuration. The seeder is equipped with a small micro-meter seed box in the front, a large micro-meter seed box in the middle, and an optional agitator box can be added as the rear seed box.
