WARRANTY

H & S WARRANTY

H & S Manufacturing Co., Inc. ("H & S") warrants this product to be free from defect in material and workmanship. Except as noted below, this warranty term is twelve (12) months from the date of delivery of the product to the original purchaser by an authorized H & S dealer. Under this warranty, H & S will repair or replace, at its option, any covered part which is found to be defective in material or workmanship during the applicable warranty term. In no case will the covered repair cost of a part or parts exceed the replacement cost of that part. Warranty service must be performed by H & S or a dealer authorized by H & S to sell and/or service the product involved, which will use only new or remanufactured parts or components furnished by H & S. This warranty includes approved parts and labor to fix the product but does not include, and the purchaser is responsible for, any service call and/or transportation of the product to and from the dealer's place of business, for any premium charged for overtime labor requested by the purchaser, and for any service work not directly related to any defect covered under this warranty. This warranty includes only those components of the product manufactured by H & S. Warranty for any component not manufactured by H & S including, but not limited to, engines, batteries, tires, rims, hydraulic motors, pumps, etc. are covered by the warranty, if any, provided separately by their respective manufacturers.

This warranty in all its parts, is extended solely to the original purchaser of the product, is terminated upon any subsequent transfer or sale from or by the original purchaser and extends no third party benefits or rights whatsoever.

The warranty term for any product used in any commercial, custom, for hire or rental application, is limited to six (6) months from the date of delivery of the product to the original purchaser by an authorized H & S dealer.

Polybonded (polyethylene and plywood) panels utilized in H & S Manure Spreaders are warrantied, to the original purchaser, to not wear through and the polyethylene overlay to not tear free of the plywood for the functional life of the spreader. This specific warranty on polybonded panels includes only replacement of any defective panel part without any allowance for labor beyond the terms of the general warranty (12 or 6 months), and is further limited to manure spreaders used to spread normal agicultural manure.

This warranty does not include: (1) Any product that has been altered or modified in ways not approved by H & S; (2) Depreciation or damage caused by normal wear, misuse, improper or insufficient maintenance, improper operation, accident or failure to follow the product Operator's Manual recommendations and product decal recommendations; (3) Normal maintenance parts and service; (4) Repairs made with parts other than those available from H & S or performed by anyone other than H & S or a dealer authorized by H & S to sell and/or service the product involved.

To secure warranty service the purchaser must report the product defect to a dealer authorized by H & S to sell and/or service the product involved within the applicable warranty term together with evidence of the warranty start date and make the product available to that dealer within a reasonable period of time.

THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE DESCRIPTION ON THE FACE OF THIS WARRANTY. H & S and the companies affiliated with it makes no warranties, representations, or promises, express or implied, as to the performance or freedom from defect of its products other than those set forth above and NO IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS OR FITNESS FOR A PARTICULAR PURPOSE IS MADE. IN NO EVENT WILL THE DEALER, H&S OR ANY COMPANY AFFILIATED WITH H&S BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. The ONLY REMEDY the purchaser has in connection with the breach of performance of any warranty on H & S products are those set forth above.

The selling dealer has no authority to make any representation or promise on behalf of H & S, or to modify the terms or limitations of this warranty in any way.

BE ALERT!

THIS SYMBOL IS USED THROUGHOUT THIS BOOK WHENEVER YOUR PERSONAL SAFETY IS INVOLVED. TAKE TIME TO BE CAREFUL. REMEMBER: THE CAREFUL OPERATOR IS THE BEST OPERATOR. MOST ACCIDENTS ARE CAUSED BY HUMAN ERROR. CERTAIN PRECAUTIONS MUST BE OBSERVED TO PREVENT THE POSSIBILITY OF INJURY OR DAMAGE.

YOUR SAFETY

IS INVOLVED.

TRACTORS

This operator's manual uses the term "Tractor" when identifying the power source for towing and lifting rake.

H & S MANUFACTURING CO. INC.

RECOGNIZE SAFETY INFORMATION

This is the safety-alert symbol. When you see this symbol on your machine or in this manual, be alert to the potential for personal injury.

Follow recommended precautions and safe operating practices.

UNDERSTAND SIGNAL WORDS

A signal word- DANGER, WARNING, or CAUTION - is used with the safety-alert symbol. DANGER identifies the most serious hazards.

Safety signs with signal word DANGER or WARNING are typically near specific hazards.

General precautions are listed on CAUTION safety signs.

FOLLOW SAFETY INSTRUCTIONS

Carefully read all safety messages in this manual, and all safety signs on your machine. Follow all recommended precautions and safe operating procedures.

Keep signs in good condition. Immediately replace any missing or damaged signs.

- KEEP YOURSELF AND OTHERS WELL CLEAR OF MOVING PARTS.
- DISCONNECT ALL POWER BEFORE SERVICING OR CLEANING THIS MACHINE.
- · DO NOT EXCEED 20 MPH

72203A

TRACTORS

This operators manual uses the term "Tractor" when identifying the the power source for towing and lifting rake.

WARNING

TO PREVENT SERIOUS INJURY OR DEATH

BEFORE YOU ATTEMPT TO OPERATE THIS EQUIPMENT, READ AND STUDY THE FOLLOWING INFORMATION. IN ADDITION, MAKE SURE THAT EVERY INDIVIDUAL WHO OPERATES OR WORKS WITH THIS EQUIPMENT, WHETHER FAMILY MEMBER OR EMPLOYEE, IS FAMILIAR WITH THESE SAFTEY PRECAUTIONS.

DO NOT attempt to perform maintenance or repair with tractor running.

DO NOT step up on machine at any time.

DO NOT allow minors to operate or be near the machine.

DO NOT ALLOW PERSONNEL OTHER THAN THE QUALIFIED OPERATOR NEAR THE MACHINE.

Loose or floppy clothing should not be worn by the operator.

Stop the tractor engine, remove ignition key, and allow all mechanisms to stop before cleaning, working, or adjusting on machine.

Stay clear of hydraulic lines, they may be under extreme pressure or heat.

Stay clear of rake when opening or closing main rake arm beams, or raising or lowering rake wheels.

For transport, always make sure that the hair pin at the rear of the lift pipes, and the transport lock bars with safety clip pins for main rake beam, are securely locked in place.

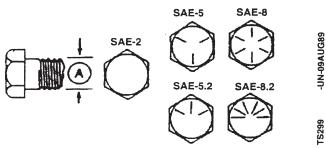

To reduce stress on rake arms, lift pipe, springs and spring brackets, reduce oil flow from tractor to lift cylinders whenever possible.

Be sure to raise rake wheels before opening or closing main rake beams.

H&S Mfg. Co. always takes the operator and their safety into consideration and guards exposed moving parts for their protection. However, some areas cannot be guarded or shielded in order to assure proper operation. In addition, the operators manual and decals on the machine itself warn you of further danger and should be read and observed closely.

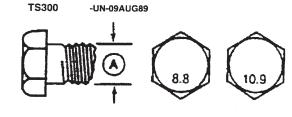

Study The Above Safety Rules ATTENTION - BE ALERT - YOUR SAFETY IS INVOLVED

1-1/4"	1-7/8"	665	(490)	1492	(1100)	2393	(1765)						

CAUTION: Use only metric tools on metric hardware. Other tools may not fit properly. They may slip and cause injury.

DO NOT use these values if a different torque value tightening procedure is listed for a specific application. Torque values listed are for general use only. Check tightness of cap screws periodically.

Shear bolts are designed to fail under predetermined loads. Always replace shear bolts with identical grade. Fasteners should be replaced with the same or higher grade. If higher grade fasteners are used, these should only be tightened to the strength of the original.

Make sure fastener threads are clean and you properly start thread engagement. This will prevent them from failing when tightening.

Tighten plastic insert or crimped steel-type lock nuts to approximately 50 percent of amount shown in chart. Tighten toothed or serrated-type lock nuts to full torque value.

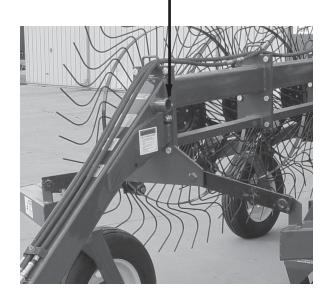

OPERATION

- 1. Check for proper assembly and adjustment and make sure that all bolts are tightened. Securely retighten after a few hours of operation as bolts can loosen up on new machinery. Check wheel bolts upon delivery and periodically thereafter. Wheel bolts should be tightened to 85-95 ft./lbs. of torque.
- 2. Check tires and inflate to pressure (6.70 x 15 to 36 pounds).
- 3. Adjust the tractor hitch (13 to 17 inches above ground) and attach rake to tractor with a **hitch pin** with a safety locking device.
- 4. Remove weight from lift jack. Remove jack from pipe mount and place on convenient storage mount located on the front top of pole (see below).
- 5. Connect hydraulic hose for raising and lowering rake wheels from rake to a double acting valve on the tractor.
- 6. Connect hydraulic hoses for opening and closing the rake to a double acting valve on the tractor.
- 7. Connect 7-pin electrical connector to tractor (If equipped with optional lighting).
- 8. Lubricate the machine completely.
- 9. On all rake wheels, tooth bolts must be torqued to 40 ft./lbs. to help prevent excessive tooth breakage. Re-torque rake tooth bolts after the first 100 acres. (Part No. T175). Check periodically thereafter.

NOTE: Determine right or left side of your 1460-1660 Hi-Capacity Rake by viewing it from the rear. If instructions or parts lists call for hardened bolts, refer to bolt torque chart on page 9.

JACK STORAGE POSITION

OPERATION (Continued)

TRANSPORT LOCKS, FRONT & REAR

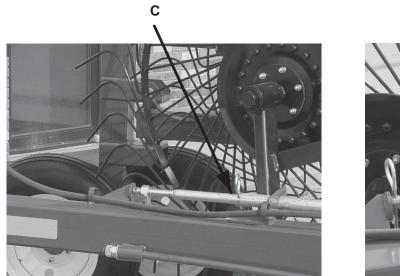

RAKE BEAM LOCKS

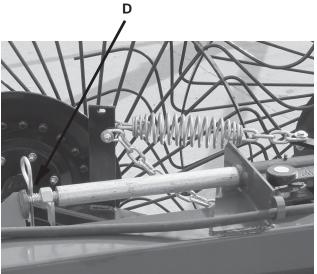

Transport locks are mounted to the front of the pole. (A) Shows the rake locked into transport position. (B) Shows the transport locks in the convenient storage postion, to be used when in the raking mode.

RAKE WHEEL LOCKS

Located at the rear of the lift pipe, is a hair pin which is used to secure the rake wheels in the up position for transport (C). When in the down, or raking position, place the locking hair pin in the convenient storage position as shown (D).

ADJUSTMENTS

HITCH

There are ten different positions to adjust the hitch on your new Hi-Capacity Rake. Hitch should be adjusted so main frame of the rake is level or parallel to the ground.

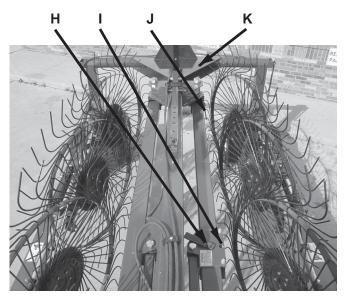

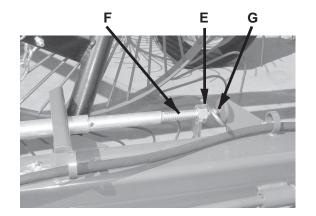

GROUND PRESSURE

Rake wheel to ground pressure is adjusted by turning Locking Nut and Collar (E) in to decrease pressure, or out to increase pressure. The length of the Threaded Bolt (F), between (E) and Stop (G), will determine the rake wheel to ground pressure.

ONE SIDED RAKING

Raking with one side only can be accomplished by first locking the left side of the rake into transport position utilizing both the front and rear transport locks. Next, remove Pin (H) attaching front linkage arm to main linkage arm, and place in storage hole (I). Also remove Pin (J) at the rear of the main linkage arm and place in the storage position (K) located in hitch attachment gusset at the rear of the rake (Lowering of rake wheels will aid in removal/ installation of pins. Be sure rear transport lock is in transport position prior to raking with one side.). The right side can now be opened, and used to rake. **NOTE:** Only the right side of your Hi Capacity Rake can be used in this manner.

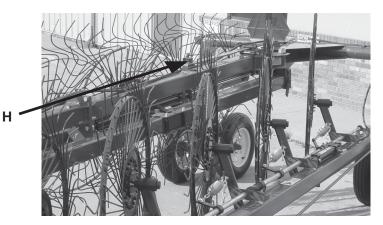

ADJUSTMENTS (Continued)

RAKING WIDTH

Raking width is determined by setting the spring loaded stop, located above the rear pole section as shown. (H)

WINDROW WIDTH

Windrow width is adjustable from 38" to 58". Adjustment is made by turning crank (I), located on the left of the rear of the rake as shown.

GAUGE WHEELS

Outboard gauge wheels are located on the forward section of each rake beam. These gauge wheels support the rake beams to allow the rake wheels to better follow the contour of the ground. Located on the gauge wheel pivot spindle is an adjustable brake assembly. Adjust brake by tightening bolt (J). The brake should have enough tension to prevent zig-zag motion, but still allow the wheel to pivot when making corners.

LUBRICATION GUIDE

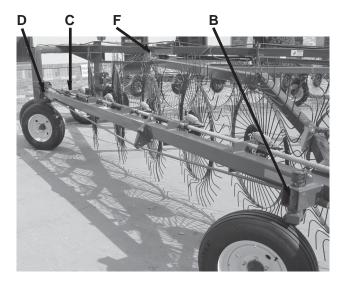

GREASE FITTINGS

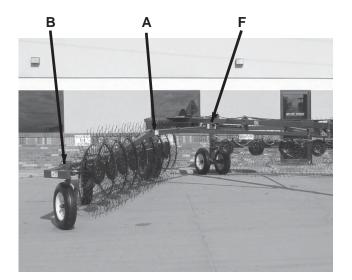

There are 20 grease fittings on the 1460 and 1660 Hi-Capacity Rakes. If equipped with a center kicker wheel, there will be one more on the pivot point. If lubricated properly and often enough, it will prolong the life of your Hi-Capacity Rake. Grease daily during normal use and **before and after storage and after power washing.** Use a good grade of high quailty grease. Make sure that grease comes out around the shaft on sleeve type bearings. Wipe off excessive grease to prevent accumulation of chaff or grit around the bearing.

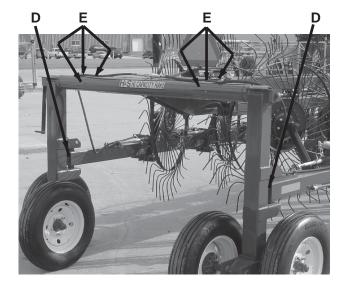

LOCATION

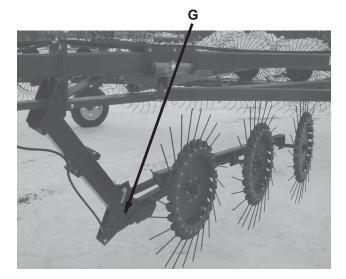

Listed and shown are the description of location and number of grease fittings.

- A. (2) Top Opening Arm Front Pivot
- B. (4) One on Each Gauge Wheel
- C. (2) One on Each Lift Cylinder Mounting Bracket
- D. (2) One on Each Rake Beam Pivot
- E. (6) Top Rear Windrow Width Adjustment
- F. (4) Top Opening Arm Rear Pivot
- G. (1) Center Kicker Wheel Pivots (If Equipped)

DECAL LOCATION

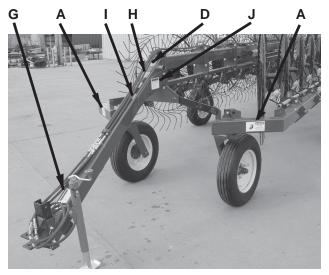

Your H&S 1460 and 1660 Hi-Capacity Rake was manufactured with operator safety in mind. Located on the Hi-Capacity Rake are various decals to aid in operation, and warn of danger or caution areas. Pay close attention to all the decals.

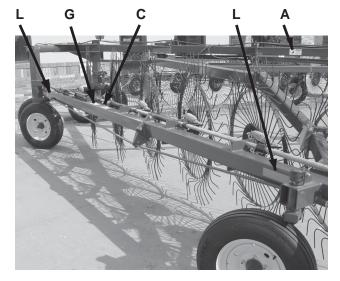

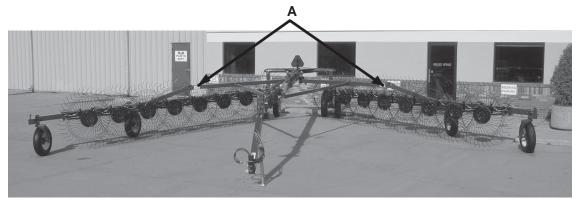

DO NOT REMOVE ANY OF THESE DECALS. IF DECALS ARE LOST, DAMAGED, OR IF THE HI-CAPACITY RAKE IS REPAINTED, REPLACE DECALS. REMEMBER: DECALS ARE FOR YOUR PROTECTION AND INFORMATION.

Listed below are the decals on your H&S Hi-Capacity Rake. These decals may be ordered individually by part number or by ordering complete set.

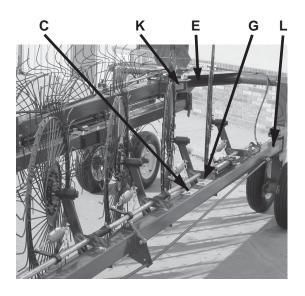

ITEM	PART NO.	DESCRIPTION
Α.	11694A	(8) DANGER - Stay Clear of Rake

Μ

TROUBLE SHOOTING

WARNING MAKE SURE THAT THE TRACTOR IS SHUT OFF AND THE RAKE CAN NOT MOVE BEFORE SERVICING THE 1460-1660 HI-CAPACITY RAKE. MAINTENANCE AND REPAIR SERVICE WORK TO BE PERFORMED BY A QUALIFIED SERVICE PERSON ONLY.

TROUBLE	POSSIBLE CAUSE	POSSIBLE REMEDY
Rake Will Not Open	Rake Locked In Transport	Remove Transport Locks And Return To Storage Position (See Page#11)
	Hydraulic Couplers Not Coupled To Tractor Properly	Couple Hydraulic Hoses To Tractor (See page#10)
	Hydraulic Hoses Mixed Up With Rake Wheel Lift Hose	Sort Hoses Correctly And Re-couple To Tractor
	Tractor Hydraulics Do Not Have Sufficient Pressure	Tractor Should Have At Least 1500 PSI To Operate Rake NOTE: If Tractor Has Low PSI Drive Forward Slowly And Open Rake At The Same Time
Rake Will Not Close	Tractor Hydraulics Do Not Have Sufficient Pressure	Tractor Should Have At Least 1500 PSI To Operate Rake NOTE: If Tractor Has Low PSI Back-up Slowly And Close Rake At The Same Time
Rake Wheels Will Not Lower	Rake Wheels Locked In Transport	Remove Hair Pin From Adjuster, Place In Storage Position (See Page#11)
	Lift Pipe Binding	Check Lift Pipe Make Sure It Is Free Moving
	Tractor Hydraulics Not Able To Operate Single Acting Cylinder	Consult Your Tractor Dealer on How This Can Be Accomplished

OPTIONAL EQUIPMENT

OPTIONAL KICKER WHEEL

There are two optional center kicker wheel assemblies available for the 1460-1660 Hi-Capacity Rakes. If the hay is laying out flat, these extra wheels allow you to raise the hay laying in the center of the rake out of the stubble for faster drying, and easier pick-up. A separate cylinder controls the kicker wheel assembly. It raises and lowers with the rake wheels.

2-WHEEL KICKER WHEEL

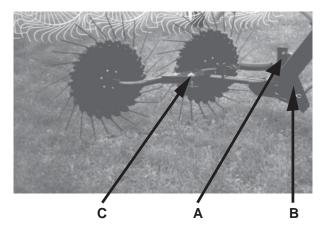

To engage center kicker wheels, hydraulically open rake to desired raking width. Remove Locking Pin (C), swivel kicker wheel assembly to the desired raking angle. Re-insert the locking pin. Next, remove Locking Pin (A) from transport lock position, and insert into convenient Storage Position (B). Lower rake wheels to begin raking.

To return to transport position, PRIOR TO CLOSING RAKE, raise rake wheels. (This will also raise the center kicker wheel assembly). Remove Locking Pin (C), Swivel kicker wheel assembly so that it is in line with the hitch pole. Re-insert Pin (C). Remove locking pin from Storage Position (B), and insert to lock the unit into the up, or Transport Position (A). Rake beams may now be closed for transport.

3-WHEEL KICKER WHEEL

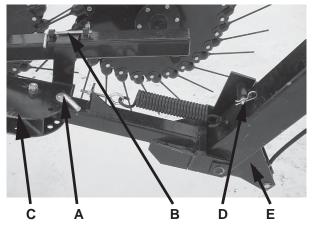

To engage center kicker wheels, hydraulically open rake to desired raking width. Remove Locking Pin (A), swivel kicker wheel assembly to the desired raking angle. Re-insert the Locking Pin. Next, remove Locking Pin (B) from the oscillation lock position, and insert into the convenient storage position (C). Next remove the transport lock pin (D) and insert into the convenient storage position (E). Lower rake wheels to begin raking.

To return to transport position, PRIOR TO CLOSING RAKE, raise rake wheels. (This will also raise the center kicker wheel assembly). Remove Locking Pin (A), Swivel kicker wheel assembly so that it is in line with the hitch pole. Re-insert Pin (A). Remove locking pin from Storage Position (C), and re-insert pin (B) into the oscillation lock position. Next remove lock pin (D) from storage position (E) and insert to lock the unit into the up, or Transport Position. Rake beams may now be closed for transport.

2-WHEEL KICKER WHEEL

3-WHEEL KICKER WHEEL

INSTRUCTIONS FOR ORDERING PARTS

All service parts should be ordered through your authorized H & S dealer. They will be able to give you faster service if you will provide them with the following

- 1. Model & Serial number is located on the left, rear main frame of your unit.
- 2. All reference to left or right apply to the machine as viewed from the rear.
- 3. Parts should not be ordered from illustration only. Please order by complete part number.
- 4. If your dealer has to order parts give shipping instructions:

VIA truck - large pieces (please specify local truck lines)

VIA United Parcel Service (include full address)

SERVICE / MAINTENANCE RECORD

DATE	DESCRIPTION	NOTES

H&S 1460-1660 HI-CAPACITY RAKE

Your new H&S 1460-1660 Hi-Capacity Rake has been manufactured of the finest quality materials and components. The performance you get from your machine is largely dependent upon how well you read and understand this manual and apply this knowledge. There is a right and a wrong way to do everything. Please do not assume that you know how to operate and maintain your Rake before reading this manual carefully. Keep this manual available for ready reference.

1460-1660 SPECIFICATIONS

	1460	1660
Number of Wheels.		
Wheel Diameter		60"
Teeth per Wheel		
Tooth Diameter	7mm	7mm
Transport Width	8'8"	8'8"
Transport Length		
Maximum Raking Width		
Windrow Width Adjustment.		
Weight		
Rake Wheel Hubs	Ball Bearings	
Hitch Jack	Standard	
Tail Lights	Optional	
Center Kicker Wheel	Option	al
res		x 15
Warranty:		

See Warranty on Page #1

NOTE:

Determine right or left side of 1460-1660 Hi-Capacity Rake by viewing it from the rear. If instructions or parts lists call for hardened bolts see page 9 to identify.
