

LAND LEVELERS

Land Leveler

These rugged scrapers come in a range of sizes from 8 to 12 feet to fit your needs and your equipment. Standard on all models is our 1/2 inch thick reversible hardened cutting edge, ready to smooth out the bumps and fill in the hollows. Cutting depth is controlled by a 3"x12" hydraulic cylinder so you can decide how much of a bite to take and adjust on the go. All models are well suited for feedlot and soil reclamation or swale cutting.

Features

- 1/2" x 6" reversible hardened cutting edge
- Equipped with a 10" jack or 15" available on request
- 3" x 12" hydraulic lift cylinder
- 3" x 6" cylinder to tilt 10° each way

Adjustable Skid Bars
