

- More impact, faster driving
- Drives 4-5 inches post in as little as 10-15 seconds
- No digging, no pointing, no tamping, no setting
- Easy hydraulic or crank adjustments to plumb posts
- Drives steel and wood posts, even railroad ties
- Includes rubber guard to shield the operator from the point of impact
- Grand Slam (HD-12-S) has no springs, blocks, or studs

## Construction and Operation:

All Post Drivers come with patented Safety Arm, which holds the post in position, providing added safety to the operator. The driver is mounted on a base plate that allows the unit to tilt in two directions, making it easy to drive posts straight – even in uneven terrain. **New patent pending Master Cylinder unit with its own hydraulic system eliminates dirt and foreign material in the operator's skid steers hydraulic system.**

## Features & Specifications:

	HD-8	HD-10	HD-12
<b>Impact at Full Stroke</b>	30,000 lbs.	71,500 lbs.	100,000 lbs.
<b>Max. Post Width</b>	7-1/8 inches	8-3/4 inches	10-7/8 inches
<b>Max. Post Length</b>	9 feet	10 feet	10 feet
<b>Cat. I, II or III Assembly</b>	Cat. I & II	Cat. II & III	Cat. II & III
<b>Mounting</b>	Front or rear or skid loader	Front or rear or skid loader	Rear or skid loader
<b>Hydraulic requirements</b>	3-4 gpm/1,500 psi	12 gpm/1,500 psi	15 gpm/2,000 psi

## Optional Accessories:

- **Concrete Breaker** is available for all Post Driver models and will break residential concrete. Simply drill and bolt to mount to the bottom of the driving ram.
- The optional **Steel T-Post Holder** positions the steel post squarely in the driver for safe and accurate placement.
- **Pilot Auger** attachment makes post driving in the toughest soil conditions even easier. The unit's powerful 4" or 6" auger opens a pilot hole before driving the post. This new option reduces wear on the driver and significantly increases productivity by allowing the operator to drive post more quickly (available for HD-10 & HD-12.)
- **Positioner** lets you position the driver with pinpoint accuracy. A hydraulic swivel rotates the driver up to 155 degrees and extends 24 inches past the tire, making it easier to position posts without the need to move the tractor.

If you have a newer model Skid Steer that has a 3/8" male Case-Strain connector, you can now hook up a standard Shaver Post Driver without having to buy our Master Cylinder Driver. Shaver Manufacturing has a Case-Strain Valve Adapter that returns the excess hydraulic fluid from the return line through the 3/8" male connector located on your skid steer connector bank back into the hydraulic reservoir.

The part number for Case-Strain Valve adapter is SM-SL-HSRK. List price is \$511.50.

This should save you over \$1000 versus our Master Cylinder Driver.
