# DISC MOWERS

- The mowing unit articulated joint is conceived to obtain the best adaptation to the ground contour. Cuts along edges and slopes are thus obtained without problems.
- In case of obstacles there is a mechanism which pulls back the mowing unit so that the blow is immediately warded off. The mechanism resetting is obtained through the reverse movement.
- Adjustment spring: this spring allows the mowing unit pressure adjustment on the ground, following the ground consistence.
- Detail of the peculiar oval disc shape and of the helicoidal section knives.

SPECIFICATIONS		DM 4	DM 5	DM 6	DM 7
CUTTING WIDTH	MT-INCH	1,67-65 <sup>3</sup> / <sub>4</sub>	2,05-80 <sup>3</sup> / <sub>4</sub>	2,40-94 <sup>1</sup> / <sub>2</sub>	2,80-110 <sup>1</sup> / <sub>4</sub>
