North Star*

Corn head with knife to knife residue management

Two counter rotating snapping rolls with four knives each to provide maximum stalk cutting. This system is ideal for row spacing of 20"-40".

Quick Facts

- Hydraulic deck plate adjustment
- Internal row unit slip clutch
- End row augers
- Wear protectors on poly (New design on 30" poly)
- Hydraulic block single point connection
- Additional hydraulic block for Lexion combines necessary (surcharge +\$3,000)
- Additional adaption for John Deere X9 combines necessary (surcharge +\$4,990)

Options

- Less End Row Augers (-\$2,600)
- XDC Rolls upgrade (additional +\$1,340 **per row**) 
- IDEAL AutoDock (surcharge +\$4,792 for single drive, +\$8,430 for double drive)

Prices and Specifications may be subject to change without notice. Prices do not include shipping or setup.

Patriot North Star*

Premium corn head with knife to knife residue management

Using the well-know North Star* system, the wide angled gathering chains of the Patriot leaves a more open design of the entry area allowing for a gentle crop intake. This head has the flexibility to harvest single or twin rows in any condition.

Quick Facts

- Hydraulic deck plate adjustment
- Internal row unit slip clutch
- End row augers
- Wear protectors on poly
- LED Illumination kit
- Hydraulic block single point connection
- Additional hydraulic block for Lexion combines necessary (surcharge +\$3,000)
- Additional adaption for John Deere X9 combines necessary (surcharge +\$4,990)

Options

- Less End Row Augers (-\$2,600)
- Available for single row or twin row configurations
- XDC Rolls upgrade (additional +\$1,340 **per row**) 
- IDEAL AutoDock (surcharge +\$4,792 for single drive, +\$8,430 for double drive)

North Star* Horizon

Corn head with swinging blade residue management

Dual knife roll head equipped with swinging blade chopper that can be disengaged, when desired. The swinging blade reduces the stalks to uniform lengths and spreads chaff evenly, which leads to optimum decomposition. This system is ideal for row spacing of 20"-40".

Quick Facts

- Hydraulic deck plate adjustment
- Internal row unit slip clutch
- End row augers
- Wear protectors on poly (New design on 30" poly)
- 2 stalk stompers supplied for combines with standard tires
- Hydraulic block single point connection
- Additional hydraulic block for Lexion combines necessary (surcharge +\$3,000)
- Additional adaption for John Deere X9 combines necessary (surcharge +\$4,990)

Options

- Less End Row Augers (-\$2,600)
- IDEAL AutoDock (surcharge +\$4,792 for single drive, +\$8,430 for double drive)

Prices and Specifications may be subject to change without notice. Prices do not include shipping or setup.

North Star* Horizon Stover Collect

The North Star* Horizon Stover Collect completes two operations in a single pass. It gathers the stover from the entire working width into a central swath, conditioning the material perfectly for further processing. Corn stover is a good alternative to silage corn for bio-gas production and use as forage. The swath is then easily harvested by a baler, forage wagon or forager.

Swathing system advantages:

- The stover material is clean and uncontaminated
- It reduces field traffic while getting the same amount of work done
- It minimizes harvest chain costs
- Special knives with angular knife bars improve the crop flow
- Including a mechanical swathing board which allows for swathing and spreading
- Header height & lateral tilt control
- Hydraulic block single point connection
- Additional hydraulic block for Lexion combines necessary (surcharge +\$3,000)
- Additional adaption for John Deere X9 combines necessary (surcharge +\$4,990)
- IDEAL AutoDock (surcharge +\$4,792 for single drive, +\$8,430 for double drive)
