

HLA SILAGE FACER

SILAGE **FACER**

The Hydraulic Loader Mounted Silage Shaving Attachment

Your Game Face
FOR FEEDING.

A Close Shave FOR AN AIRTIGHT SEAL.

SILAGEFACER

Face off against spoilage.

To maintain quality feed it's important to keep air out. When silage is faced with a regular bucket, deep cracks and fissures can form. Air can penetrate through these cracks, feet deep into the silo potentially causing premature spoilage and reducing the quality of the feed. One of the best ways to avoid this is to keep a clean, smooth face that doesn't trap air or moisture. The HLA silage facer is designed to help you better manage your silage and maintain your feed quality. Not only does the facer help you maintain the face of your silo, it also gives you more control of how much feed you remove at a time further reducing waste.

Heavy Duty Roller Chains

Dual heavy duty roller chains transfer the power from the hydraulic drives to the cutting drum. They provide excellent slip resistance and are easily serviceable.

Hungry Teeth

The ravenous teeth are designed to slice and shave your toughest silage. Made from high tensile steel they are shaped to easily remove feed and not get clogged.

Dual Hydraulic Motors

The driving force behind the HLA Silage facer is two hydraulic motors that work together to provide the silage ripping power you need to get the job done right.

- Minimum 20 GPM required
- Maximum flow 40 GPM
- Facing drum mounted on a 4 ft frame
- 400 Brinell high tensile steel teeth on drum
- Includes hose kit and flat-faced couplers
- Dual drive motors
- Heavy duty roller drive chains

BK60

- Slice bales up to 72" in diameter
- Grabs and retains plastic wrap and net wrap
- Top clamp eliminates "tail" dropping into mixer
- Cuts down TMR processing time up to 30%
- The BK60 and 72 have adjustable bumper to accommodate bales down to 48"
- Individual bolt on knives for easy replacement
- Minimum hydraulic pressure: 2700 PSI

HLA **SILAGE** **BLADE**

ATTACHMENTS

The HLA Silage Blade is a rugged angle blade designed for moving high volumes of silage when the big harvest comes in. Equipped with hydraulic angle and tilt, this blade evenly cuts across silage bunkers and directing materials to create a level area for packing. The Silage Blade is a two piece unit consisting of the DBA Undermount custom fitted to each tractor and a rugged silage blade available in a variety of widths.

1 DBA Undermount

- Tucks in close to the frame for permanent mounting
- Forward mounted hydraulic connectors for ease of connection
- Manual locking pin to secure blade frame when connected

2 Silage Blade & Frame

- Attached Silage blade and frame ensures easy hook up and safe storage
- Radial lift
- Hydraulic tilt
- Hydraulic angle
- Blade oscillates
- Extra height for piling snow

Silage Blade - Articulated Tractors

Silage Blades

FB10

- For front wheel assist tractors only
- Compatible with SB5QDM Series undercarriage blade mounts. See Undercarriage Tractor Mounts on page 60
- Heavy duty construction with two angle cylinders
- Reversible cutting edge
- Skid shoes are standard
- 58" high blade
(34" high mouldboard)
(24" high mesh guard)
- 3 x 16 cylinders with 1½" diameter pins
- Available in CAT 2 or 3, three point hitch
