

**BIG ARM**

**Big Arm Skidsteer Backhoe**

**Dig Faster, Reach Higher,  
DON'T GET OUT OF THE CAB.**

## Dig this.

HLA's Big Arm gives you the power to dig deeper, reach higher and reposition easily – without getting out of the cab. The Big Arm digs down 6 feet, making it ideal for most landscaping or light construction applications. Reaching up approx. 12' high\*, also makes it simple to empty your bucket into a nearby wagon or truck. The hydraulic boom swings a full 110 degrees allowing the operator to pick up or dump material on either side of the pit. For skidsteer owners, this means versatility like never before.

The Big Arm can truly outrun the competition – and we mean outrun. The well-engineered design avoids the need for side stabilizers as with other backhoe attachments. The heavy-duty construction includes grease fittings on all pivot points and brass bushings on key wear points. Also, the hydraulics are directly connected to the controls inside the skidsteer, allowing the operator to stay inside the cab while running the backhoe. Buckets are available in 9", 12", 15", 18" and 20" sizes to suit your digging needs. These simple yet efficient advantages make it easy to maneuver the skidsteer in a matter of seconds, saving you time and money.

Add a new level of versatility to your skidsteer with the powerful HLA Big Arm and you'll never have to leave your cab again. For more information and purchase details contact your authorized HLA dealer.

*Approximately*  
**12' high**  
**140° range**

## Miscellaneous Attachments

- QTach to most skidsteer loaders
- 6 ft digging depth
- Hydraulic swing cylinder with 140° swing
- Single electric selector valve with universal electro-hydraulic harness kit. 12V or 24V coils available.
- Second boom mount on side of frame for digging along side foundations etc.
