WAC-A-TRAC I

STRAIGHT RIGID MODEL with TWO RANKS OF TINES

LORENZ

MFG. CO.

Eliminates Costly Tractor Tire Compaction Increases Yields up to 25%

College studies show yield losses up to 25% due to soil compaction.

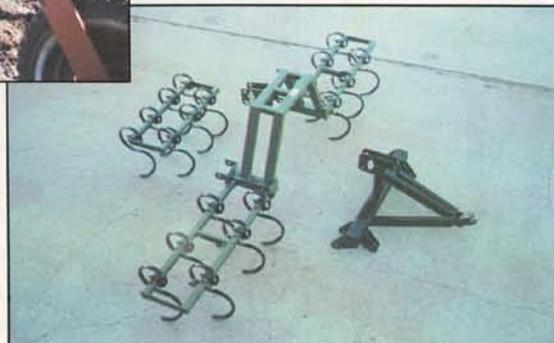

Wac-a-Trac reduces water run-off on unlevel terrain, eliminating tracks that can act as "canals."

The Lorenz Wac-a-Trac's extremely low price allows it to pay for itself the first season just in extra profits.

- Pull Drill or Planter directly from Tractor Drawbar or
- Add Center Section and 3-pt. Planter and Drill Hitch to break crust all the way across in front of Drill or Planter.
- Center Section, Planter and Drill Hitch work on Wac-a-Trac I and II.

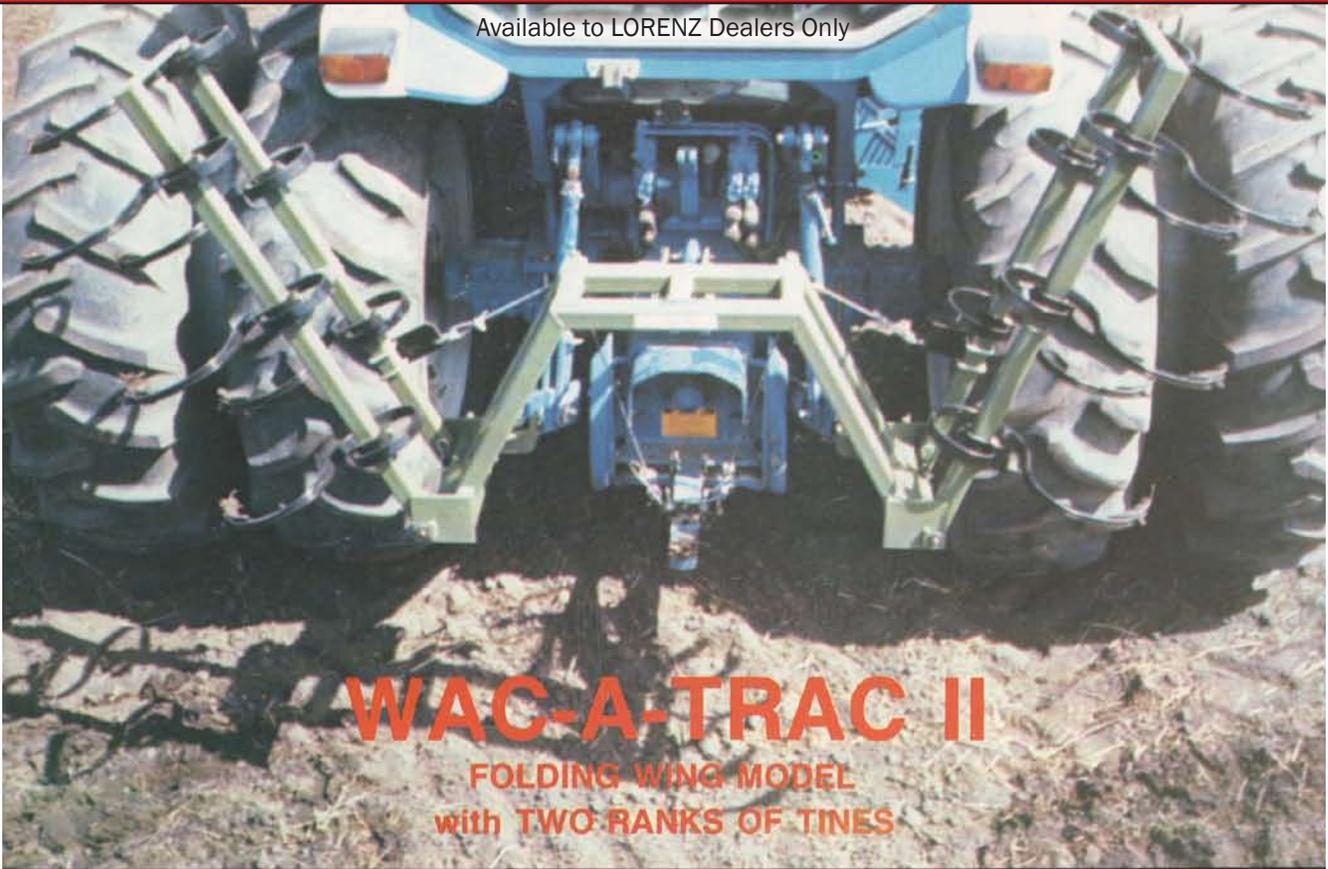

- 7½ ft. main frame to which you may add 1', 2', 3' or 4' extensions to extend out as far as 15½ ft.
- Sturdy 2-Bar Frame provides strength and offers excellent trash clearance.
- Heavy Duty Braces and Depth Control Gauge wheel option are available. Recommended when using 3' or 4' extensions.

Available to LORENZ Dealers Only

WAC-A-TRAC II

FOLDING WING MODEL
with TWO RANKS OF TINES

LORENZ

MFG. CO.

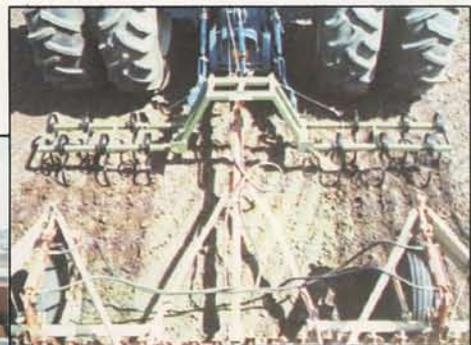

- Make shorter turns.
- Save a pass through the field.
- Break the hard crust and till your ground ahead of drill or planter before seeding.

- Two ranks of tines in sizes up to 15'8" wide.
- Wings fold up from the main frame to make shorter turns.
- Easy operation with pulleys and cables simply by raising the 3-point hitch.

Folding WAC-A-TRAC improves turning radius. The WAC-A-TRAC will raise high enough to clear the implement hitch on most tractors.

- Removes costly tire compaction ahead of Drills or Planters.
- Optional Equipment includes:
 - * 3 pt. Planter and Drill Hitch
 - * Center Section
 - * Gauge Wheel option for depth control
