

FINALIZER™

The Finalizer combines Cobra™ disk blades with a patent-pending Talon™ sweep to increase water movement and promote better root growth.

TALON SWEEPS

- The vertical blade on the Talon sweep cuts 2.5" below the sweep to slice through the compaction layer left by the sweep.
- Unique hard facing allows the vertical blade and sweep to wear at the same rate.

COBRA DISK BLADES

MODEL	Finishing Configuration	Width	List Price	With Hyd. DP Kit ^{1,2} List Price
FN-6024-CR3RB	Conditioning Reel with 3-Bar Harrow and Single Rolling Basket	24'3"	\$106,051	\$109,104

FN-6032-ST3RB	Spur-Till with 3-Bar Harrow with Single Rolling Basket	31'9"	\$126,868	\$129,921
FN-6032-ST5FA	Spur-Till with 5-Bar Harrow	31'9"	\$125,314	N/A

¹ Hydraulic down pressure kit

² When ordering a model with a hydraulic rolling basket, add an "H" at the end of the model name to denote the hydraulic basket. Example: FN-6024-CR3RBH

CONDITIONING OPTIONS

SPUR-TILL TREADER

Levels and conditions the soil. With hydraulic down pressure adjustments on the eight-tine wheels on 6" spacing.

CONDITIONING REEL

An aggressive, hydraulically adjustable rolling basket to mix, incorporate, and size clods while leveling the soil.

FINISHING CONFIGURATIONS

3-BAR FLEXIBLE SPIKE TOOTH HARROW WITH A SINGLE ROLLING BASKET

Best in heavy residue and dry conditions, our proven spike tooth harrows closely follow the ground for more leveling and firming.

5-BAR FLEXIBLE SPIKE TOOTH HARROW

For maximum leveling and minimal firming, the 5-bar is best in minimal residue and wet conditions.
