## 1000 RPM PTO KIT

Available for 97D, 108D and 120D models, this kit allows larger tractors to run at 1000 RPM PTO.

The 1000 RPM Kit also raises the input shaft to allow the PTO shaft to run at a lesser angle on larger tractors increasing the efficiency and life of the driveline components. The reduction box allows you to reverse the rotation so you can mount a regular snow blower to the front of a tractor.

PTO shaft not included.

MK Martin has completely redesigned the Pull Type Tractor Snowblower. Most notably with the redesign, the new Pull Type blower now cleans tight to the garage door, with no need for an additional back drag system. Connecting to your tractor's 3PH, the inverted snowblower allows you to drive straight forward pulling the blower instead of backing into the snow. Easier on your neck, the pull type blower is ideal for quickly clearing driveways and laneways.

## TIVAR WEAR PARTS

Tivar is a wear resistant plastic that replaces steel cutting edges and bolts onto the skid shoes.

Optional on Pull Type models, the tivar is gentler when clearing, ideal for interlocking brick and decorative stone.

# Self Powered Snow Throwers

## FEATURES

For tractors and compact skid loaders without hydraulic remotes, MK Martin offers our self powered snow thrower.

While being easy to attach with no drive lines or hoses to worry about, the engine belt drives the shaft which transfers power to the rotor by a roller chain.

These self powered snow throwers are ideal for moving snow quickly with precision in mind. The flared body opening helps to cut snow and direct to the efficient rotor assembly.
