WESTENDORFMFG SJG907010

1) At the ram end of the cylinder barrel, remove

the spiral retaining ring from the top of the gland.

**NOTE:** The G-E gland does not use the spiral retaining ring.

2) Gently drive the gland into the barrel using a brass or nonmarring punch until the round retaining ring is visible.

3) Remove the round retaining ring using a pair of long nose pliers.

4) Remove the ram assembly (ram, gland, and piston) from the barrel.

5) Notice the direction they are pointing so they can be properly assembled.

6) Remove the jam nut and/or hex nut from the end of the ram.

7) Remove the old seals and rings and replace them with the new seals and rings. (Seal kits are packaged for several different cylinders. You may have extra parts.)

8) Clean the cylinder with cleaner and a clean lint free cloth.

9) Lubricate the seals and rings to aid assembly.

**10)** Assemble the cylinder by reversing the order.

#### CYLINDER REPAIR TIPS

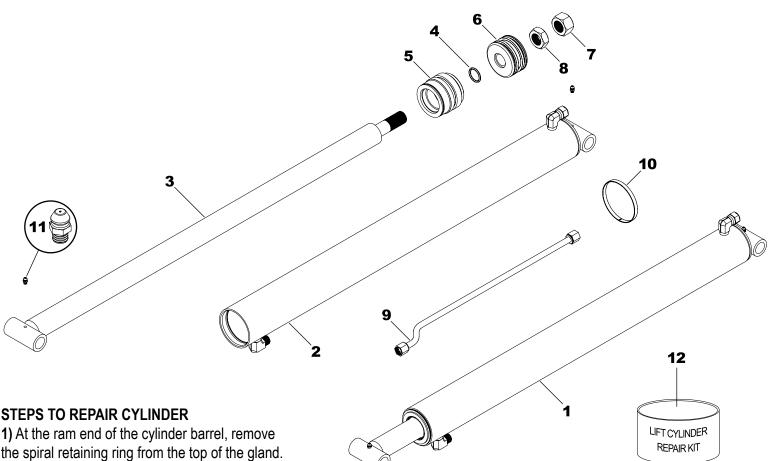

- When disassembling cylinders, keep the parts in correct orientation. Remove parts in sequence.
- Note the direction of the piston and gland. Lay out old seals and parts as they are removed.
- Assemble cylinder in the proper order; lubricate to aid assembly.

## **BUCKET CYLINDER REPLACEMENT PARTS**
