GETS MORE FOR YOUR FIELD

BISON

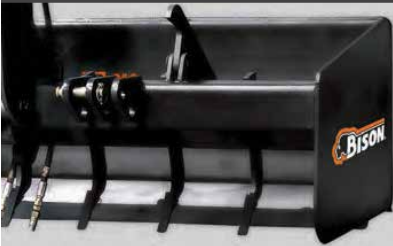

BOX BLADE

BB SERIES

Bison's Box Blades are designed for rugged use by landscapers, farmers, homeowners, and in light construction.

They are great for landscaping, land leveling, backfilling, grading, road maintenance, cleaning construction areas, gardens and many other applications.

They have 2 high carbon steel reversible cutting edges (one front and one rear).

The scarifier shanks are replaceable and positioned in a hydraulically driven square tube, allowing breakage of the compacted topsoil.

Soil displacement can be accomplished by forward and backward operations, due to the dual cutting edges available. Cutting edges are reversible and replaceable.

3-PT. BOX BLADES
